KERFKORE COMPANY INTRODUCES PRODUCT CATALOG

Kerfkore Company, a manufacturer of patented bendable substrates and panel products, just released a new catalog on its on line of patented bendable materials and lightweight rigid panels.

The bendable products covered in this catalog include Kerfkore, Timberflex, Flexboard, FlexGreen and econoKORE. Information is also presented on their line of Foamkore lightweight rigid panel products plus their line of architectural beadboard products.

Green products are available from Kerfkore Company. FlexGreen, KerfGreen and Foamkore-Green all made with NAF cores and can qualify for LEED credit MR 4.1, MR 4.2 and EQ 4.4. The LEED (Leadership in Energy and Environmental Design) green building rating system is the accepted benchmark for the design, construction and operation of high performance green buildings.

The literature contains detailed product specifications, which include product descriptions, product characteristics, core options, bending capabilities, product classifications, item numbers and dimensions, plus rating and test data and recommendations regarding adhesives, temperature conditioning, laminating pressure, handling, and storage.

Free Kerfkore literature and additional information are available from:
