Foamkore FR, New Product from Kerfkore Company

Kerfkore Company, a manufacturer of patented bendable substrates and lightweight panel products, is introducing its newest type of Foamkore, the Foamkore Fire Rated.

This product is a Class A lightweight panel that meets ASTM E 84 certifications. The face material consists of 1/8" non flame spreading material. This construction combines a lightweight durable non combustible face with a polystyrene core to achieve a Class A lightweight material. Product contains no added formaldehyde.

ASTM E 84 test results achieved a flame spread of zero with smoke development of zero. Product will give weight reduction of 60% and up when compared to FR Particleboard and MDF.

It is available in 4' X 8' panel size and in thicknesses from 3/4" up to 3".

Don't forget to stop by the Kerfkore Company booth, #2763, at the 2010 IWF Show in Atlanta, Georgia from August 25-28! Let us tell you about our bendable and lightweight products.
