Foamkore Product from Kerfkore Company

Kerfkore Company produces a lightweight product called Foamkore which helps to reduce weight for lightweight applications. Foamkore is a very popular item. Architects and designers continue to find new ways to apply Foamkore when weight reduction is a must. The internal banding works really nice when attaching Foamkore and it is becoming a more popular option with the product. Another option is Foamkore FR (Fire Rated) for applications where you need to have a flame resistance and smoke development of zero.

Kerfkore Company is a manufacturer of patented bendable substrates, lightweight structural panels and architectural panels. These products allow for the creation of numerous designs that open the opportunity to produce curves and innovative products as vast as your imagination. No matter what type of curve or lightweight needs you may have, we have a product that can provide quicker results that are more accurate, with higher quality, and easier to fabricate than traditional methods. We are committed to providing "green" products that can have a positive impact on our environment and also help you achieve some of the qualifications needed for the USGBC's LEED certification program.
