## Keep It Simple...

## Italian Bending Poplar

Italian Bending Poplar Plywood is a flexible 1/8" material that can be formed into curves and radii as required while providing a smooth face surface. This high quality, clear Italian Poplar will provide an even surface that can be used as is, painted, stained or laminated with a decorative surface.

### Product Characteristics

- Produced under strict tolerances and high standards with superior quality Italian Poplar veneer
- Three-ply construction provides for a stable product while still allowing it to bend into desired shapes
- Italian Poplar can be used in multiple layers to fabricate a formed curved panel or as a stand alone face covering over other traditional forming materials
- Italian Poplar may be attached to framework by use of glue or staples depending on the desired method
- Available in nominal 4 x 8 or 8 x 4 sheet sizes

### Bending Capabilities

The bending radius obtainable using the 1/8" Italian Poplar Bending Poplar is normally a 5" radius.

### Product Classification and Dimensions

Item #	Panel Size	Thickness
BP12IP	96-7/8" x 48-13/16"	.115"
BP12IPX	48" x 96"	.115"

### Packaging

Both sizes are packed for shipment in quantities of 100 per skid
