Just Imagine: *Lightweight + Bendable*

Imagine being able to utilize lightweight panels which can either be purchased or fabricated to bend. How could you design or build your project with these and other blended features? Sustainable and fire-rated options available. Ask.

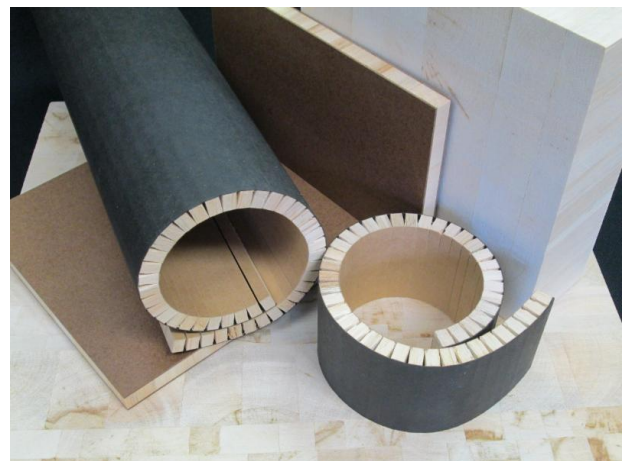

Most of you are familiar with our particleboard core *bendable* panels (SK, TF, FB) but did you know that we offer lightweight core options as well?

Our flat, lightweight *Foamkore* is also available in a 3/4" kerfed version. Better yet, purchase material from your local Kerfkore distributor and post-kerf *Foamkore* in your own shop using your own fabrication methods (select faces only).

View attached images and consider a broad range of project options. Suspended, vertical, horizontal, traditional, modern or tomorrow's design. Regardless of project or industry type, both lightweight construction and curved design are great options.

Refer to our September 2017 newsletter for *flat* lightweight project possibilities using our product lines.

Lightweight + Bendable Options

Foamkore Bendable Options

Foamkore 3/4" with Hardboard faces

Factory post-kerfed (special order)

Foamkore with Hardboard faces

Fabricator cut, Fabricator discretion

**Bendable Line Lightweight Options
(Kerfkore, Timberflex, Flexboard)**

Balsa core
Poplar ply core

Contact your local Kerfkore Distributor to inquire further on product options or fabrication methods:
