## New Foamkore Internal Perimeter Edgeband From Kerfkore Company

Foamkore continues to be a great product for Kerfkore Company. We are seeing more activity for projects that need the weight reduction Foamkore provides. It's a product that your customer easily sees the potential for use and they continue to come up with ingenious ways to incorporate it in their projects. A few of the many usages for Foamkore include ceilings, signs, partitions, walls, shelves, stage props, doors, marine panels, cabinets, furniture, motor homes, and even boats.

Kerfkore Company now offers Foamkore with an optional internal perimeter band. We can provide these internal bands made of MDF, particle board, solid wood, and plywood as needed. This allows for many more options when considering your customers edge treatment requirements. Panels can also be manufactured to custom sizes and thickness as required for the project. The advantages of having a structural lightweight panel with this multipurpose edge treatment are almost unlimited. Please contact your salesman or contact us to learn more about this new option from the Kerfkore Company.
