New Painted Foamkore from Kerfkore Company

Foamkore, a balanced constructed panel with greatly reduced weight, is now available with a painted fiberboard face and available standard in white or black. The face material is 1/8" fiberboard with a UV cured painted surface for superior durability. Panels are available with painted faces on one or two sides as needed. Other colors are available as custom orders based on quantity.

Painted Foamkore panels are available in a nominal panel size of 4' X 8' with overall thickness options available from 3/4" up to 3".

Painted Foamkore offers a weight reduction of 66% for 3/4" material and up to a 90% weight reduction for other thicker material is obtainable when compared to particle board or MDF panels.

Panels are available with an optional internal frame of MDF or solid lumber.

Optional custom sizes in width and length are available based on quantity requirements, check with factory for more details.
