## Top 2011 Kerfkore Distributors

Each year, Kerfkore Company gives two distributor awards based on their purchases and sales of Kerfkore products. The first award is for the largest volume; the second, for the greatest percent increase compared to the previous year.

For 2011, **Distributor Service, Inc.** receives the award for the Largest Volume Distributor of Kerfkore products. They sell the complete line of bendable and lightweight panels plus they inventory these materials so they can be delivered quickly to supply their customer's requirements. Their growth this year was achieved through standard product sales along with some nice customer projects. We appreciate DSI's support from their management and sales team to make this award possible.

For the Greatest Sales Increase in 2011, the award goes to **Wurth Wood Group**. They also sell a complete mix of bendable and lightweight products and inventory a complete representation of the Kerfkore product line. Their growth was a combination of strong sales from a variety of these bendable and lightweight products. We appreciate their effort in achieving this increase in 2011.

Pictured L-R, Mike Capper (COO), Dave Quackenbush (Southeast Sales Manager for Kerfkore), Tom Phillips (President at Kerfkore), Roger Debnam (President at Wurthwood Group), Scott Sittler (Marketing Manager at Wurthwood Group), and Chris Hiatt (Purchasing Manager at Wurthwood Group).

Our congratulations to **DSI** and **Wurth Wood Group** for their performance in 2011. We are delighted to present them with the Distributor of the Year awards from Kerfkore Company.

Kerfkore Company is a manufacturer of patented bendable substrates, lightweight structural composite panels and architectural panels. These products allow for the creation of numerous designs that open the opportunity to produce curves and innovative products as vast as your imagination. No matter what type of curve or lightweight needs you may have, we have a product that can provide quicker results that are more accurate, with higher quality, and easier to fabricate than traditional methods. We are committed to providing “green” products that can have a positive impact on our environment and also help you achieve some of the qualifications needed for the USGBC’s LEED certification program.
